

DESIGNED ARCHITECTURAL LIGHTING
TRANSPORTATION

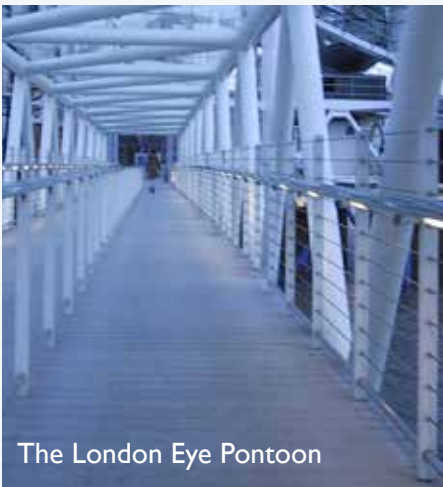

TRANSPORTATION

Crossrail -
Elizabeth Line, Farringdon,

DAL has been involved in all aspects of transport lighting since they began trading in 1984. Standard products and custom designed luminaires have been supplied to many projects including station platforms, airport terminals, train carriages, cruise ships, pedestrian foot bridges and riverside pontoons. DAL even designed luminaires for recreational transportation projects.

The extent of product types that have been supplied, either highly technical and specialist in small quantities or many thousands of standard luminaires, are many and varied.

The London Eye Pontoon

DAL understands the complex safety requirements of products for public areas. The necessary Ingress Protection for exterior or harsh environments must be ensured. Glare control and light distribution are key to the comfort and safety of people within these spaces. The products energy consumption is of prime importance to the environment. DAL has a wealth of experience in the design and manufacture of luminaires for harsh weather and extreme conditions, also bomb and fire proofing.

Dublin Airport, Pier D
