

# LINEAR GRAZER

High-Performance Architectural Luminaire

10 Gresham Street  
Architect - Gensler  
M&E Consultant - AECOM

**Linear Grazer** is a high output, low glare linear LED light fixture which is perfect for high level architectural space and wall grazing. It can be surface or ceiling mounted. It has a slim profile and a robust build quality. It consists of an aluminium extrusion, an integral driver with a lockable tilt angle, and a plug-and-play connection. The optical control is provided by precise lenses and a low glare grill. High Output LED 3550-4670 lumens (delivered). Nominal length 1468mm.

## Nominal Dimensions

**Linear Grazer**, a high-performance LED fixture designed for illuminating, accentuating, and washing vertical surfaces in high-level architectural applications.

## Key Features

**High Output & Low Glare:**

Delivers 3550-4670 lumens, designed to highlight surfaces while maintaining visual comfort through specialized optical control.

**Optics:**

Uses precise lenses and a low-glare grill to ensure even, controlled illumination.

**Construction:**

Robust, slim-profile aluminium extrusion.

**Installation:**

Suitable for surface or ceiling mounting, featuring a lockable adjustment for precise positioning.

**Power:**

Features an integral driver and plug-and-play connectivity for easier installation.

**Dimensions:**

Available in a 1468mm length, with options for continuous rows or stand-alone units.

## Ideal Applications

**Wall Grazing:**

Bringing out textures in stone, brick, or wood.

**Wall Washing:**

Providing uniform, high-output lighting for facades, columns, or high-level walls.

**Architectural Feature Lighting:**

Suitable for commercial and high-end residential, retail, or hospitality projects.

## General Specification

Colour Rendering:	CRI 80 (CRI 90 on request)
Colour Temp:	2700K / 3000K / 3500K / 4000K
Beam Angle:	12° / 25°
Wattage:	45W, 230V, 50/60Hz (nominal)
Surface Finish:	White RAL 9010 / Black RAL 9005
IP Rating:	IP20 (dry interior use)
